Though cancer is the second cause of female death in the US and 1 in 7 women will be diagnosed with breast cancer, the medical community is still unable to find answers to eliminate this disease. There is also an increased risk for an abnormal breast cancer gene in Ashkenazi Jewish women.

Please show your support for finding a cure for breast cancer
by becoming a Beth Tfiloh Chai Team Member.

**Can't walk?
You can still
show your
support by
registering as a
“Sleep in”**
